Education

B.E. in Computer Engineering
SKNSITS Lonavala, Pune, Maharashtra, India

Jun 2023 – Jun 2027

Experience

Think Decor — AR and AI powered interior design platform

Android Developer

Feb 2026 – Present

- Architecting 2 Android apps (customer + seller) from scratch using Jetpack Compose across 10+ core screens in a 4-member team.
- Designed modular MVVM architecture using ViewModel + StateFlow, structuring predictable UI state and reducing recomposition issues.
- Integrated 15+ REST APIs using coroutine-based networking with structured error handling and clean repository abstraction.

Metry AI — Service Booking Platform for SMBs

Mobile App Developer

Oct 2025 – Jan 2026

- Built a cross-platform app (merchant + customer) using React Native (Expo) with ~85% shared business logic.
- Developed 6+ production screens and shipped 4 complete features integrating 10+ backend APIs.
- Reduced UI duplication by ~30% through reusable component abstraction across both apps.

Projects

Dexverse (8k+ Downloads) — Kotlin, Jetpack Compose, MVVM, Koin, Retrofit, Coil

[PlayStore](#) | [GitHub](#)

- Developed a production Android app with 20+ Compose screens and 25+ API integrations using repository-based MVVM.
- Implemented local caching strategy to reduce redundant API calls and improve repeat load performance.

Facenox — Kotlin Multiplatform, Compose Multiplatform, MVVM, ML Kit, Koin

[GitHub](#) | [Download](#)

- Built a cross-platform photo editor for Android and Desktop using shared Compose UI.
- Implemented 15+ editing tools including filters, crop, drawing, and face detection.
- Developed offline-first local project storage for private and fast editing workflows.
- Reduced duplicate platform code by ~70% using shared business logic.

Technical Skills

- **Languages:** Kotlin, Java, SQL, XML
- **UI Frameworks:** Jetpack Compose, KMP / CMP, Android Fundamentals
- **Architectures & Concepts:** MVVM, Dependency Injection (Hilt, Koin), Coroutines, REST API
- **Libraries & Tools:** Retrofit, Ktor, Room (SQLite), Firebase SDK, Android SDK, Git/GitHub
- **Cloud & Backend:** Firebase Firestore, Firebase Authentication, Firebase Cloud Messaging
- **Developer Tools:** Android Studio, Git, GitHub, Postman, Firebase Console

Achievements

- Contributed 6 merged pull requests across 3 Android repositories during Hacktoberfest.
- Solved 400+ data structures and algorithms problems in Java with focus on complexity optimization and pattern recognition.
